When the **PLANTATION BITTERS** were first made known to the American people some years ago, it was supposed they were an entirely new thing, and had never before been used. So far as their general use in the United States is concerned, this may be true. It is so true that the same Bitters were made and sold in the Island of St. Thomas, over forty years ago, as any old planter, merchant, or sea captain doing business with the West Indies will tell you. It is distinctly within my recollection that on the return of my father, who was an sea captain, and doing an extensive trade in the tropics, he would invariably have the Bitters among the ship's stores, and our family board was never without them. For any sickness, it matters not how severe or trifling, the doctor of these Bitters, by a different name, was always resorted to as a sovereign remedy. **MAURITIA WATER**—Superior to the best imported German Cologne, and sold at half the price.

Don't be Humbugged.

It is an admitted fact by all that the quotations of Memphis cotton market are 11@2 cents better than that of Nashville, and when we ask the farmer why he does not send his cotton to our market, the reply is, we have been told our cotton will not sell with that raised farther South. The sharp commission merchants of our neighboring city have used this argument very successfully, but we hope the planters will test the matter for themselves. The cotton of Tennessee sells as well as that of any other State. We sell it all from the same table, and think we can prove that you have been humbugged, if you will give us a trial. Freight at present \$1.10 per bale to Memphis—only \$1.10 more than to Nashville. From Huntsville, \$2.25; Pulaski, \$2.50. **W. H. MOORE** and **J. L. COLE** are our agents in this county, and will furnish bagging and rope, and advance on consignments. **McGUIRE, Ezell & Hill** agents at Pulaski. It **MOORE & NORTON**.

Great crowds are hurrying in and packing off **BAGLEY BROS' Furniture** of all descriptions because they sell it so very cheap. They have **Wood Screens** that every farmer ought to have and certainly not be without. They have oodles of **Groceries** that everybody will buy when they examine the stock and prices.

BAGLEY BROS.
Corner Market St. and Square.

The November number of "The Little Corporal," a magazine for boys and girls, and for older people who have young hearts, is on our table, and we must say it is one of the best works for the young folks that we have seen. Its tales are interesting, its poetry pretty, its composition excellent. Published in Chicago at \$1 a year.

Gardner's mill, near Elkton, was the scene of a bloody transaction on Tuesday, 13th inst. A dispute between a simple-minded white boy aged 14 years and a negro, resulted in the negro's cutting the boy's abdomen open with a hatchet, so that his bowels fell out. The negro was arrested.

In Tennessee the white people pay a tax of five per cent on all their property, and the negroes and carpet-baggers disfranchise eighty thousand white men. That is what the Radicals call reconstruction.

Asounding Rascality.

At the recent term of the Circuit Court at Smithville, DeKalb county, Judge M. M. Brien, a Radical, of Nashville, in his argument to the jury, said that—"there is a regular partnership existing between Wm. G. Brownlow and Colonel Blackburn on the following terms: That the said Colonel Blackburn shall arrest and convey to Nashville all men in that section of the State who are accused of horse stealing, murder, and other crimes, and that when they have arrived in Nashville and before they are tried, Brownlow shall offer a reward for their arrest, Brownlow and Blackburn divide the money between them, sharing equally in the profits arising from Brownlow's recent proclamation."

Judge Brien elicited this statement from the evidence of Col. Blackburn. The partnership develops a species of infamy heretofore unknown.

We have been shown a communication from Brownlow, dated the 12th, in which he annuls A. H. Russell's commission, as Commissioner of Registration, orders him to close his office, and turn over his books and papers to his successor, when appointed and qualified. The person is trying to concoct some rascality.

LATER.—Brownlow has set Russell's certificates aside!

The young people of Fayetteville and vicinity propose having a **soiree** at the Miller block tomorrow evening (Friday). We thank them for a complimentary ticket, and hope they may have a pleasant time.

The Fair commenced last Tuesday. The attendance on the first day or two is always limited, increasing as the week progresses. The hope now is for as complete success as crowned last year's efforts.

The Clerk and Master, in another column, advertises a special term of the Chancery Court.

Some time ago a coffin was received at Newmarket, a station on the railroad about twenty-five miles above Dorn's Mine, in Edgefield district, South Carolina, marked to a noted Radical. The suspicion of the station master being excited by its weight, it was opened, and found to contain new Enfield rifles. These were taken out, and a few days after the coffin was delivered to the person to whom it was directed, who had the prudence to keep silent in regard to the loss of the contents.

ENGLISH FEMALE BITTERS.—To use the expression of druggists, the sales of this medicine are truly wonderful and the effects are astonishing. Tornado like, it sweeps everything before it, and at once commands the confidence and esteem of physicians, druggists and the public. It is used and highly recommended by the medical fraternity, and sickly families, old and young, are suffering with any form of female complaint should lose no time in procuring a bottle of this valuable medicine. It restores health and beauty to the pale and wan girl of sixteen, imparts vigor, youthfulness and buoyancy to the frail desponding mother of forty, and composes, invigorates and soothes in old age. Send your remittance to "Great Southern Preparations."

"How Chilly the Evenings in October"

This is a common remark; yet how few think of the danger of exposing themselves to their influence. In all our marshy localities, Ague and Fever prevail at this season of the year. In this disease there is invariably more or less derangement of the liver and digestive organs. The remedia usually resorted to have reference to preventing the prostration or breaking up the chills. If this effected without removing the cause, a relapse is inevitable. **HOSTETTER'S FEMALE BITTERS** strike directly at the fountain-head of the evil, by acting on the liver and correcting digestion. The cause being removed, the prostration will cease, and the chills cannot return. When the patient is weak and debilitated, the BITTERS should be resorted to, as they will strengthen and tone the stomach, allay all nervous irritation, and infuse renewed animation into the hitherto drooping spirits, without creating the danger of reaction. **HOSTETTER'S STOMACH BITTERS** is truly a preventive medicine, rendering even the feeblest frame impervious to all malarious influences; and, as a stomachic and anti-bilious, its use is indispensable, and no one who values his health can afford to do without it. Fortify the system with this inestimable tonic and invigorant, and the Chills of October Evening will have no terror for you.

AGRICULTURAL MACHINERY. suited to the season, at manufacturers' prices, freight added. Also the best **Sorgho or Cane Mill**, Corrugated and Flat-bottomed Evaporators, and Cane Juice Clarifiers ever introduced into the South. We are now fully under way, manufacturing our celebrated new

FAN MILL, SEED SEPARATOR, AND SMUT MACHINE COMBINED,

and will, after this date, be able to fill all orders promptly. In this machine, we offer to the public a Wheat Fan far superior to anything of the kind ever before invented. It will easily chaff from 300 to 400 bushels of wheat per day, and cleaner at one running through than any Fan in the market. It will clean wheat from smut, cheat, cockle, blighted, broken and shriveled grains and other impurities, leaving the best, healthy, plump and perfect grain to sow. It cleans wheat for market without waste, saving the small grains. It empties the wheat directly into the half bushel, thereby avoiding the waste, as well as the time and labor formerly unavoidable in measuring up the grain. The mill runs smoother, and with less noise, besides many other improvements over the ordinary Fanning Mill. Grain dealers will give from twenty-five to fifty cents more for foul wheat cleaned on this than on the common fan. The mill has been

THOROUGHLY TESTED,

and is pronounced by all who have seen it in operation, among whom are many of the best farmers, millers, grain dealers, machinists, in this and adjoining States, to be a PERFECT SUCCESS, and a valuable invention which has long been needed.

Wanted—Energetic, Responsible Men,

Who can bring good references, and capable of conducting a business of from \$5,000 to \$50,000, to purchase an interest in this Machine. To such parties we offer extraordinary inducements, and say, come to see us, and see if we do not convince you that you can make MONEY BY a judicious investment—in handling this Separator—than in any other business. The Patent on this Fan covers EIGHT SPECIFIC and IMPORTANT CLAIMS, thereby securing to parties purchasing Territory an EXCLUSIVE MONOPOLY in this valuable invention for SEVENTEEN YEARS. Also, wanted, good, reliable men in every county, to act as Agents for the sale of the Mills. To such a liberal commission will be paid. The Mills are made of good, strong, and well-seasoned Lumber, and **EVERY MACHINE WARRANTED.**
